

**Singular Edge Metal Color Chart**  
**April 13, 2020**

**To: Versico Roofing Systems' Authorized Contractors**

Versico Roofing Systems is pleased to introduce a new, singular color chart for all VersiTrim™ products and metal flat sheets.

**New Chart Overview**

- Streamlines all VersiTrim prefabricated lines and flat sheet paint finish offerings
- Provides increased paint finish warranty coverage (up to 35 years)
- Creates better alignment among all Carlisle Construction Materials (CCM) metal brands
- Creates a path to leverage additional distribution centers across multiple CCM metal brands

**Inventory Transition**

For all new orders of VersiTrim 200/2000 and VersiTrim 300/3000 products, please use the new color chart. Colors that are not listed on the new chart are available as custom colors.

**Referencing Previous Colors**

If you are trying to find a close or exact match to an old color, it is important to indicate from which chart you selected that color. Versico's Specialty Products Team is thoroughly trained to help you through that process and ensure the proper colors are provided.

**Sales Collateral and Tools**

- A new VersiTrim and Metal Flat Sheet Color Chart has been created and is available on the Versico website [here](#).
- Print versions of the chart, with accurate color chips and sample metal color chips, can be requested using the Online Literature and Sample Order Form, which can be found under "Forms" on your online dashboard. You must be logged-in to access the order form.
- For additional information on edge metal warranty inclusion, please reference the Edge-to-Edge Warranty Sell Sheet on the Versico Website.

If you have any questions, or for more information, please contact your Specialty Products Team member.

Sincerely,

Taylor Gingerich, Roofing Accessories Product Manager
