

**Hydropack Modular Roof Garden System: Pre-Purchased Stock
November 17, 2020**

To: Versico Roofing Systems' Authorized Contractors

Versico Roofing Systems is excited to offer a pre-purchased and ready-to-ship stock of pre-vegetated Hydropack Modular Roof Garden trays.

For several years now, Hydropack has been Versico's modular tray system of choice due to its innovative design, easy installation, and excellent long-term performance. Earlier this year, Versico pre-purchased stock of Hydropack trays for a lower, flat price. This allows Versico to offer more competitive pricing for modular Roof Garden projects and meet or beat competitor pricing, even when priced direct to the contractor.

In addition to pricing, the pre-purchased Hydropack stock allows Versico to supply 95% to 100% pre-grown Hydropack trays to the jobsite within two to three weeks of order placement, compared to four- to six-month lead times for competitors' trays. Versico provides no-charge, single-source overburden warranties of up to 20 years on Hydropack trays when installed over a properly designed and installed Versico roofing system.

Versico's pre-purchased Hydropack trays can be quoted now with shipping to begin in early Spring.

Versico offers a full line of Roof Garden products to meet almost any project design. If you have any questions regarding Hydropack, or any of the available Roof Garden products or systems, please reach out to your Versico Independent Sales Representative.

Best Regards,

Christopher Kann
